### Sensational Serums from Ageless Serums

Ageless Serums has developed formulations using the best active ingredients. Ageless Serums were calibrated according to their synergistic cosmetic properties to create superior serums for all skin types. Our Serums are manufactured, packaged and tested in accordance to Good Manufacturing Practices as outlined in the Code of Federal Regulations. The facility is registered with the United States Food and Drug Administration.

## Pure Aqua

### High Tech Hybrid Aqua

#### Pure Aqua is the foundation of all our serums

Pure Aqua is a pharmaceutical grade water, meaning the same base water used for medical injections. Pharmaceutical grade water has 8 different categories and is regulated by the United States Pharmacopeia standards. The water that is graded USP Water for injection has gone through an extensive purification process to remove everything but the water. Medical grade water starts with purified water then continues the purification process. The water is twice de-ionized and reverse-osmosis filtered which removes bacterial endotoxins, colloids, particle matter and microorganisms. **Pure Aqua is the purest of waters.**

Pure Aqua is designed to deeply cleanse while hydrating and soothing the skin. Fight dry skin, wrinkles and aging by hydrating the skin directly. Pure Aqua is ideal for all skin types hydrating indulgence with nature's pure vitality.

**AGELESS SERUMS:**

Directions: Apply with a serum based skin-moisturizing soft for cleansing, exfoliation and hydrating all skin types.  
 Ingredients: Pure Aqua  
 Ageless Serums

Salicylic Wash	Topically applied Glycolic Acid 10% / 30%	Skin Deep Prep	Ageless Antioxidant PLUS	Customized Vitamin C Ampoule Pure Aqua	Topically Bio-Peptide
					<u>Daily Take Home</u> Bio-Peptide Serum Vitamin C Serum

Directions: The facial protocols are listed by steps with the serum listed below the step. The first three steps of the facial are cleansing, exfoliation and extraction steps. Two serums that are used with the hydra device are Salicylic Wash and Skin Deep Prep. The step done in between is an application of a topical, manually applied acid (Pro-gel Glycolic 10% or 30%) Massage for 5 minutes so the acid activates, clients love a facial massage, remove manually not with your hydra device.

The last two steps are the infusion (with your hydra device) of beneficial serums. Ageless Antioxidant Plus is always first, followed by Peptide Infusion, Ageless Growth Factor Infusion or Skin Brightening Plus. The last beneficial serum used depends on which facial you are treating. The last serum, you make one complete pass followed with highlights on the second pass.

Important: Do not dilute serums. It has come to my attention that some device protocols have our serums diluted upon use. Please do not dilute Ageless Serums

## We now offer Hydrofacial Tips for Edge systems

**A010 – HydroFacial Small Tips, 10/pkg. \$38.00 / pkg. (replaces Teal Tip part# 74114)**
